

Versatile Flail Mower for Tractors up to 100 HP

# RJ Series

## Overview

The RJ series is a versatile model for tractors between 50 – 100 HP, suited to a range of applications including paddock and public garden maintenance.

For ease of use the RJ series features a 470mm hydraulic side shift with two sliding guides for accessing difficult to reach areas.

Fitted with an anti-shock rotor, designed so impact from hard objects is reduced, the machine will deliver time and time again. Heavy forged hammer flails are fitted as standard to tackle overgrown vegetation and deliver a clean cut.

Setting the height of the cut is easily adjusted thanks to a rear roller with forged spherical ends reducing setup time, and is aided by full length adjustable skid shoes.

With lightweight, single skin construction the RJ series is available in a range of widths all featuring a category 1 and 2 three-point linkage.

## Features

- Heavy forged hammer flails as standard
- Adjustable rear roller and full length side skids
- Heavy duty 470mm side shift with two sliding guides
- High quality components and build
