

RX Series

Overview

Best suited to lawn, park and groundcare the RX features a 150mm manual offset and is fitted with a Category 1 three-point linkage.

The RX's small size is no indication of its ability, with the compact flail fitted with a large diameter rotor carrying heavy duty forged hammer flails that cut growth with ease leaving a clean, level finish.

Cutting height is easily set with an adjustable rear roller ensuring a smooth even cut at the perfect height.

The RX Series with high quality components and well thought out engineering make this a practical machine for those looking for a compact mowing solution.

Features

- **Front or rear mountable headstock**
- **Rear roller forged with spherical ends to allow for easy adjustment of cutting height**
- **Large diameter, heavy duty rotor fitted with forged hammer flails**
- **150mm manual offset**
- **Category 1 three-point linkage with adjustable lower tractor links**
